

Sub: Engg – VUDA – Revamping of Water Supply Distribution System for Kailasagiri – Draft subject placed before VUDA Board for perusal & approval – Reg

Agenda Note

VUDA has developed Kailasa Hill as a tourist spot and public recreation centre long ago with lush greens, party lawns, Children Play areas, Food Courts and Toy Train, Ropeway, Capsule Lift, Energy park, Sanku Chakra Namam Building etc. In addition the World Telugu Museum and Jogging Track, Cycle track including Health Arena along the foot of Kailasa Hill are planned as an additional attraction and to meet the long felt requirement of Vizagites and Tourists of Visakhapatnam City of Destiny.

In the initial stage of development of Kailasagiri Water Supply Distribution System was arranged by way of bore wells and construction of multi level sumps at suitable places and pipe line network laid nearly 20 years ago. During course of time the area of lawns, greenery and other development activities have been increased enormously.

At present the demand for water has been increased considerably and the existing water supply lines as well water storage sumps are reached to deteriorated condition and sizeable quantity of water is being wasted by way of leakages and losses. Moreover pumps/motors installed earlier are worn out and efficiency of the same has been reduced.

In order to meet the requirement of water and to improve the water supply for Kailasagiri as a whole without any deficiency it is proposed to revamp the entire Water Supply Distribution System with an estimated cost of Rs.85.00 Lakhs by providing Hydro Pneumatic pumps of higher HP capacity including standby motors with direct pumping (Grundfos Make) and new HDPE pipe lines replacing the old network system to have uninterrupted and sufficient water supply once for all to Kailasa Hill.

Hence, the matter is placed before VUDA board for perusal and approval.
